

Catchment Styles

Catchment Styles

Catchment styles allow you to customise individual catchments to suit your desired look and feel.

Note: The styling made to the catchment is specific to the catchment it is saved to. It does not apply to all catchments.

Modifying your Catchment Style

Catchment Style Sections

Click on a location pin, expand the catchments section and select 'Style' icon on the catchment you wish to edit.

The Catchment Style menu is broken down into 5 sections;

1. Fill Colour

Changes the colour using a colour picker.

2. Fill Opacity

Makes the catchment colour more or less opaque.

3. Outline Colour

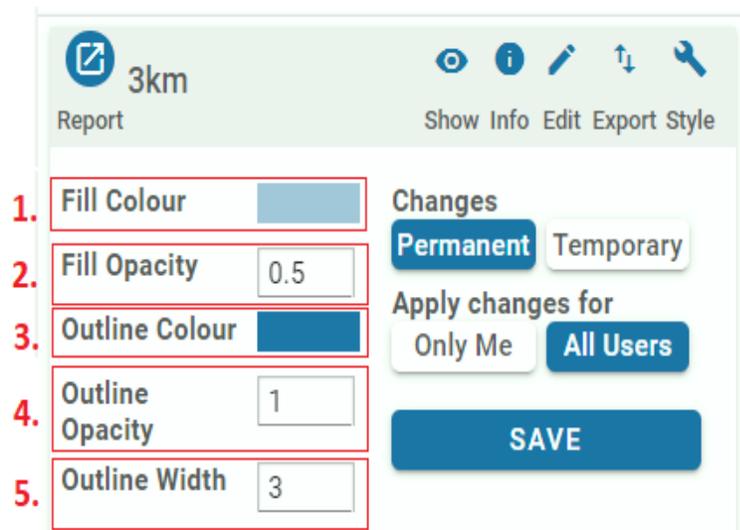

Changes the colour of the outline.

4. Outline Opacity

Makes the outline more or less opaque.

5. Outline Width

Changes how thick or thin the outline is.

Saving Preferences

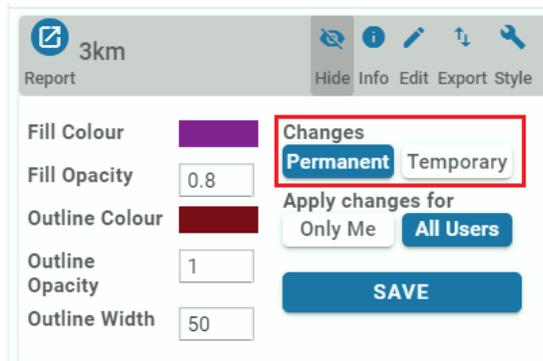

Changes

Select whether you would like your Catchment Style changes to be either:

Permanent: The catchment style will be saved and available for the catchment created whenever you login to GapMaps.

OR

Temporary: The catchment style will be saved only until you log out GapMaps or close the GapMaps window.
