

NearMap Integration (Australia only)

[NearMap](#) is an Aerial Imagery business that integrates with GapMaps Live. In order to use this integration, you will need a NearMap account and access to your NearMap API key.

[Follow this guide](#) to obtain your API key from NearMap.

If you require further help from NearMap, [click here](#).

NOTE: By using this integration, you will be consuming NearMap credits. Zooming and panning will also consume credits. Ensure you are switching the Base Map when NearMap is not required.

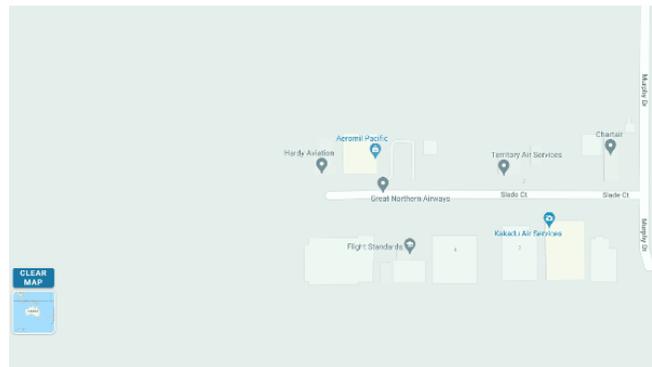

Accessing NearMap

Click the base map button in the bottom left of the map.

Select **'NearMap'**

Enter your API key into the field.

Select **'NearMap'** from the base map menu again.

Turning NearMap Off

Click the base map button.

Select a different base map.
