

Looking for the most accurate and granular population data in the Middle East?

You're in the right place.

Designed with network planners as well as strategists in mind, GapMaps cuts down on research costs, while improving the prospects of business success. It's a simple, cloud based platform which helps take the guesswork out of network planning decisions in just a few clicks.

See your business, your competitors and the forces that can impact your business. Visualise opportunities and create reports for your stakeholders. Make more informed location decisions with the most accurate and granular demographic data for your location. Control your data analysis, or let us help you to assess your opportunities.

Network Planning

View & manage current, closed and future locations in their competitive context.

Points of Interest

Identify nearby points of interest including Shopping Centres, Universities, Schools, Public Transport.

Catchment Analysis

Demographic reports are available for any point in the country based on a radius, travel time or tailored trade area.

Layers

Visualise 2020 resident and worker population and consuming class data at a 250m x 250m grid level.
